March 2022 – February 2023

Jaipur, Rj

TECHNICAL SKILLS

Languages: HTML5, CSS, JavaScript, TypeScript

Framework - Library: ReactJs, Redux-toolkit, TailwindCss, NextJs

Developer Tools: Git & Github, VS Code

PROJECTS

zoom-clone | `nextJs, reactJs, tailwind-css, shadcn, getStream-io, clerk`

- Implements authentication and authorization features using Clerk, allowing users to securely log in via social sign-on or email..
- Participants have full control over meeting aspects (pinning, muting, unmuting, blocking, allowing video share).
- Easily join meetings created by others by providing a link.
- All interactions within the platform are secure and occur in real-time, maintaining user privacy and data integrity.
- Follows responsive design principles to ensure optimal user experience across devices, adapting seamlessly to different screen sizes and resolutions.

zomato-clone | `html,css, javascript, reactJs, redux-toolkit, express, node, scss`

- Implementing a responsive UI with optimized state management for seamless user experience.
- Designing RESTful APIs using MERN for user authentication, restaurant listings, and cart management,
- Integrated Advanced Features like dynamic search, category-based filtering, and secure payment processing
- github repo [demo check](#)

spotify-clone | `html,css, javascript, reactJs, redux-toolkit, express, node, scss`

- Developed a Twitter Clone with React and scss.
- Implemented Audio Playback & Controls with React Player for seamless music streaming.
- Integrated Spotify API to fetch songs, albums, and playlists dynamically, displaying real-time data with optimized state management using Redux Toolkit.

ACHIEVEMENTS

- *JavaScript Certification from Coursera.*
- *Frontend skills development React from Hackerrank.*
- *Handled 20 group of peoples in a site of installation.*
